

To Whom It May Concern:

I am, Yurii Yurchenko Chief Technical Officer at Web Design Sun. I would like to write a letter of recommendation for Dmitrii Ivanov, who worked as a Backend Engineer (Middle Code Guru) a and was a part of my team for six months.

During our collaboration, Dmitrii consistently demonstrated himself as an exceptional engineer capable of taking ownership of complex and large-scale technical solutions. He combines strong technical expertise with a modern, efficiency-driven approach to software development.

Dmitrii has deep and confident knowledge of his core technology stack, including Python, Django, and FastAPI. At the same time, he stands out for his ability to enhance productivity by effectively leveraging modern tools in his daily work, such as LLM-based agents and advanced linting solutions.

One of the most notable projects he contributed to was the development and implementation of the large-scale “Teams” functionality. This initiative required in-depth architectural analysis and significant refactoring of core business logic. Despite the scale and inherent risks, Dmitrii’s attention to detail and technical expertise ensured a completely seamless release, with no production issues.

Another key strength of Dmitrii is his engineering flexibility. He is not limited to his primary stack and can be confidently entrusted with tasks involving new technologies, including Go or others he may not have previously worked with. He has a rare ability to quickly dive into unfamiliar domains, understand existing codebases, and adapt to new paradigms while delivering high-quality results on time.

I highly recommend Dmitrii Ivanov without reservation. He will be a valuable technical asset to any team, bringing professionalism, a forward-thinking approach to development, and a strong results-oriented mindset.

Sincerely,

If you need more information, please do not hesitate to contact me at yuri.yurchenko@webdesignsun.com.

Sincerely,

Yurii Yurchenko, Chief Technical Officer, Web Design Sun
